

Energy Efficiency Playbook of Key Actions

ORGANIZATION NAME

Use this Energy Efficiency Playbook of Key Actions to either draft your Mission Efficiency Pledge or Energy Compact, or simply guide your overall energy efficiency efforts. Select all applicable actions and add any additional specificity for your expected actions. Further, add any custom actions beyond the list of key actions.

PLANNING AND POLICIES

We commit to raise our ambition and plan for further actions, including to:

Have an active Energy Efficiency Strategy or Plan that identifies steps to strengthen the energy efficiency policy and investment framework

Submit a new or revised UN Energy Compact with comprehensive energy efficiency actions and goals ([Learn more](#))

Submit a revised Nationally Determined Contribution with comprehensive energy efficiency actions and goals

Set further high ambition energy efficiency targets for our jurisdiction or organization:

Commit to net zero by 2050 and join the Race to Zero ([Learn more](#))

Commit to further progress on energy efficiency with EP100 ([Learn more](#))

Commit to further progress on energy efficiency with EV100 ([Learn more](#))

Join the SLOCAT Call to Action on Fossil Fuel-free Land Transport ([Learn more](#))

Develop and implement energy efficiency codes, standards and labels (select all that apply):

Minimum Energy Performance Standards (MEPS) for energy using products

High energy performance standards to encourage adoption and investment in the highest efficiency products and solutions

Certificates and labels to educate decision-makers on the sustainability performance of energy using products and buildings

Develop and implement energy efficiency planning and policies for (select all that apply):

Household (lighting, refrigerators, cooking equipment, washing equipment, heating and cooling systems, fans, computer equipment, TVs)

Commercial (lighting, building management systems, heating and cooling systems, fans, pumps, computer equipment, copiers)

Industrial (lighting, energy management systems, air compressors, heat exchangers, motors, pumps, transformers)

Mobility (2 & 3 wheelers, passenger and heavy duty vehicles, tires, public transport, electric transport, battery systems and charging infrastructure)

Develop plans and policies that strengthen system efficiency (e.g., sector integration, circular economy, etc.)

Develop and implement an Energy Service Company (ESCO) or Energy-as-a-Service (EaaS) framework that allows third party investment in and ownership of energy efficiency assets

Develop and implement a policy or market mechanism to require energy audits in each energy using sector

Other custom action commitment:

INVESTMENT

We commit to increase investment in energy efficiency, including to:

Increase direct investment in energy efficiency by: %

Increase innovation investment for energy efficiency in line with Mission Innovation

Join the Mission Efficiency Marketplace to identify, de-risk and match energy efficiency investment opportunities with investors

Set energy efficiency investment procurement thresholds in preference to all lifecycle cost effective solutions

Implement a bulk procurement initiative to scale energy efficiency investment

Buy and rent **only products** with high energy efficiency labels (e.g., 5 Star, A+++,ENERGY STAR)

Buy and rent **buildings** with high energy efficiency labels (e.g., 5 Star, A+,ENERGY STAR) or high sustainability (LEED Platinum or equivalent)

Hire staff, consultants and services that can manage the sustainability of buildings and industrial processes.

Invest in systemic energy efficiency solutions (e.g., Extended Product Approach, ESCO services, ISO 50001 energy management, etc.)

Produce, advertise and/or sell energy efficient products and services

Stop producing, advertising and/or selling inefficient products and services

Implement an energy efficiency program (e.g., regulated utility-led, voluntary community-scale, company employee, etc.)

Invest time by joining and participating in other energy efficiency initiatives

Energy Efficiency Movement ([Learn more](#))

Other custom action commitment:
